Encounters with Xabier

A journey through the life and work of Xabier Morrás, a painter whose “critical realism” reveals *the beauty found on the margins of official aesthetics*. Sixty years of creation driven by a social and critical gaze-years devoted to unveiling, stirring, and confronting harsh realities filled with pain, frustration, and solitude.

Morrás was one of the selected artists in the **Basque Art exhibition** at the 1972 Pamplona Encounters, a landmark event for a generation of artists. In this project, we talk with him about his life, his work, and the legacy of those transformative days.
